The algorithm of student actions

- 1. Greetings, find out how to approach a patient, their age, and get their consent
- 2. Find out the main complaints of the patient and clarify their nature
- 3. Find out more complaints
- 4. To find out the duration of the disease, the features of its onset and course
- 5. Find out an infectious history
- 6. To find out the nature of the work, the possible harmful factors
- 7. Find out about bad habits, chronic diseases, allergies
- 8. Inform the patient of his or her syndrome

Example of questions to the patient

- 1. Good day! I'm a doctor. How can I contact you?
- 2. I will survey you. Do you mind?
- 3. I will ask you.
- 4. How old are you?
- 5. What bothers you?
- 6. What is your breathlessness during inhalation or exhalation, at what load?
- 7. What is your cough dry or cough?
- 8. Are you worried about chest pain now?
- 9. To what values did the temperature rise? What time of day was the maximum?
- 10. Is that all that bothers you, are there any other complaints?
- 11. When did you get sick, what do you associate the disease with, how did it first go?
- 12. Something treated?
- 13. Have you been in contact with anyone with similar symptoms before, or have you been to health care facilities?
- 14. What do you do for a living?
- 15. What bad habits do you have?
- 16. Have you been diagnosed with any chronic illness?
- 17. Tell me, have you ever been allergic to medicine, dust, plant pollen or food?
- 18. Fine. The nature of your complaints is indicative of pleural effusion syndrome.
