«ORTHOPEdic DENTISTRY. PRACTICAL SKILLS.

FIXED PROSTHETICS»

Scenario No. Pr1

A 48-year-old patient turned to the orthopedic department for the manufacture of a stamped crown for 27 tooth due to constant loss of fillings. It was found that the tooth was repeatedly filled due to caries, the fillings did not hold due to bruxism. The tooth is low, the enamel is fragile, the pulp is intact, the tooth is stable, the percussion is painless.

Task: Prepare tooth 27 for a stamped crown.
