CONTROL AND MARKS

Control measures include *current control*. The current learning activities of students are monitored in seminars. The following tools are used to diagnose the level of preparation of students: oral examination; test tasks; writing scientific reports. The current assessment of students takes place at each seminar (at least 30% of students must be interviewed). The current educational activity of the student is evaluated on a 4-point (traditional) scale: "5", "4", "3", "2".

The *student's independent work*, which provided in the program, is monitored and evaluated under the current supervision.

The working program of the course provides for the implementation, at the request of the student, of the student's individual independent work: 1) a student's speech with a self-prepared report on the department round of the annual university student scientific conference. 2) defense of the abstract at the seminar. 3) production of teaching aids (visual aids - maps, presentations, stands, etc.). The grade for an individual task is accrued to the student only if it is successfully completed and defended. The grade is added to the current performance. The subject of an individual task can be suggested by a teacher or a student.

As a result of studying this discipline, the student receives a "*credit*", which is set on the basis of current student activities under the following conditions: no absences or timely completion, the average score for current academic activities is not less than 3.00. The test is set at the end of the study of the discipline on the basis of current grades in the form of the average score (the arithmetic mean of all grades obtained on a

traditional scale, rounded to 2 (two) decimal places). The obtained arithmetic mean of the discipline allows you to convert to a score on a 200-point scale for further ranking on a rating scale (ECTS). According to the scores obtained on a 200-point scale, students are evaluated on the ECTS rating scale.

COURSE POLICY

The policy regarding *deadlines and retakes* is in line with the general rules at ONMedU.

Compliance with the student's *academic conscientiousness* provides for: independent performance of educational tasks. It is unacceptable in educational activities for participants in the educational process to use prohibited auxiliary materials or technical means during control events. For violation of academic integrity, students may be held academic accountable and degraded; re-passing testing, polling.

Attendance and Tardiness Policy: Attendance is mandatory. At the beginning of the lesson, the presence of students is checked. The consequence of the absence from the lesson is the obligatory further development of the topic.

Mobile devices: used for educational purposes only.

Behavior in the audience: according to the moral and ethical code of ONMedU.
