The content of the discipline

Topic 1. Higher educational medical institutions

Topic 2. Medical institutions in Ukraine

Topic 3. Examination of the patient

Topic 4. The structure of the human body

Topic 5. Sensory system

Topic 6. Musculoskeletal system

Topic 7. Cardiovascular system

Topic 8. Blood

Topic 9. Respiratory system

Topic 10. Nervous system

Topic 11. Reflexes

Topic 12. Digestive system

Topic 13. Urinary system

Topic 14. Reproductive system

Topic 15. Endocrine system

Topic 16. Microorganisms

Topic 17. Cell

Topic 18. Tissues

Topic 19. Metabolism

Topic 20. Vitamins and minerals

Topic 20. Oral cavity

Topic 21. The structure of the oral cavity

Topic 22. Anatomy of the tooth

Topic 23. Types of teeth

Topic 24. Vitamins and minerals

3. Raymond Murphy. English Grammar in Use. A self-study reference and practice book for intermediate students. Cambridge, University Press, 2016, 380 ст.

4. The Mosby Medical Dictionary. Elsevier Health Sciences, 2016, 2000 ст.

5. Lippincott Illustrated Reviews: Pharmacology, Автор Karen Whalen Видавництво Lippincott Williams & Wilkins, 2018, 576 ст.

6. Practical English Usage, Michael Swan, Видавництво Oxford University Press, 2017, 768 ст.

ASSESSMENT CRITERIA

The results of students' academic performance are presented in the form of assessment according to the national scale, 200-point and ECTS scale and have standardized generalized criteria for knowledge assessment.

At the end of the study, the current performance is calculated as the average current score, i.e. the arithmetic mean of all current grades according to the traditional scale, rounded to two decimal places.

Only those students who do not have academic debts and their average score for current educational activities is at least 3.00 are allowed to the final certification.

The form of final control is grading test. The grading test is set at the last lesson of the discipline based on the results of the final recitation with the mandatory

performance by the student of all types of work provided for in the working curriculum and assessed for the current educational activity on average not less than 3.00. The grade obtained for the answer at the grading test and the score of the average current performance during the study of the discipline are used to calculate the arithmetic mean, which is the overall grade for the discipline.

Example of a task for a grading test in English for professional purposes for second-year students of the Faculty of Pharmacy:

1. Translate the sentence into English (5 sentences).
2. Answer the questions in English (5 questions).

The score for the grading test is calculated as follows:

"5" → 9 - 10 correct answers

"4" → 7 - 8 correct answers

"3" → 5 - 6 correct answers

Grades "good" and "satisfactory", obtained by the student in the final control (grading test), are not re-added.

A student who has been admitted to a grading test and failed to take it without good reason is considered to have received an unsatisfactory grade.

Independent work of students

Individual topics from the discipline are submitted for independent work, which must be worked out by students. All methodical materials, IWS topics and tasks are posted on the university website. In case of questions, the student can seek advice from his teacher. Quality control of knowledge on IWS topics is carried out by testing during practical classes. Test tasks are also posted on the site.

COURSE POLICY

Deadline and recompilation policy

All missed classes must be completed according to the schedule of the Department of Foreign Languages (Tuesday - 1 missed class; Saturday - 2 missed classes).

Academic Integrity Policy

Adherence to academic integrity by students involves:

- ✓ compliance with legislation;
- ✓ independent performance of educational tasks;

✓ links to sources of information in the case of the use of ideas, developments, information;

✓ providing reliable information about the results of their own scientific activities.

It is unacceptable to go through the procedures of control of learning outcomes by fictitious persons.

Attendance and lateness policy

Attendance is mandatory. Late for classes is undesirable.

Mobile devices

The use of technical means (earphones, telephones, smartphones) is unacceptable in educational activities for participants in the educational process.

Behavior in the audience

The discipline «English» involves practical classes, so at each class the student must have a textbook and notebook, do homework and demonstrate the assimilation level of learning material. Students relationships in the classroom should be friendly.
