COURSE ANNOTATION

The subject of the discipline is English.

Course details: English, Latin

Postrequisites of the course: English medical terminology, features of medical terminology.

The purpose of the course is to form in medical students a foreign language professionally oriented communicative competence.

The main tasks of studying the course are:

- to interpret the content of general scientific literature in a foreign language
- demonstrate the ability to communicate in a foreign language orally and in writing forms
- to develop communication skills of cultural nature.

Expected results

As a result of studying the discipline, students must know:

- grammatical material necessary for communication in an English-speaking professional environment
- vocabulary necessary for communication in an English-speaking professional environment
- English medical terms are needed to work with English-language medical literature.

Students must be able to:

- communicate in an English-speaking professional environment
- work with English-language medical literature
- translate medical texts from Ukrainian into English and vice versa.

COURSE DESCRIPTION

Forms and methods of studying

The course will be presented in the form of practical classes (50 hours, 40 hours – students' independent work).

The following teaching methods will be used during the teaching of the discipline: verbal methods (story, conversation, instruction, independent work with the textbook), practical methods (exercises, translation of medical texts, tests), (multimedia presentations, tables, diagrams).

The content of the discipline

- Topic 1. Higher educational medical institutions
- Topic 2. Medical institutions
- Topic 3. Examination of the patient
- Topic 4. The structure of the human body
- Topic 5. Sensory system
- Topic 6. Musculoskeletal system
- Topic 7. Anatomy and physiology of the cardiovascular system
- Topic 8. Blood
- Topic 9. Anatomy and physiology of the respiratory system
- Topic 10. Anatomy and physiology of the nervous system
- Topic 11. Reflexes
- Topic 12. Anatomy and physiology of the digestive system
- Topic 13. Anatomy and physiology of the urinary system
- Topic 14. Anatomy and physiology of the reproductive system
- Topic 15. Endocrine system
- Topic 16. Microorganisms
- Topic 17. Cell
- Topic 18. Tissues
- Topic 19. Metabolism
- Topic 20. Vitamins and minerals

List of recommended literature

1. Basic:

1. Eremkina and others. English language manual for 1st year students of the medical faculty. ONMedU, Department of Foreign languages. Odessa, 2020.
2. Manual "English grammar exercises for medical students" (for student's independent work) ONMedU, Department of Foreign languages. Odessa, 2020.

2. Auxiliary:

1. Medical English for Academic Purposes, Yu.V. Lysanets, OM Belyaeva, MP Melashchenko 2018, Medicine Publishing House, 312 pages
2. English for medical students, English for medical students | A.H. Sabluk, L.V. Levandovska, 2018, Publishing House Medicine 576 st.
3. MEDICINE (OXFORD ENGLISH FOR CAREERS) 2 Student's Book, Publisher: Oxford University Press, Sam McCarter, 2010, 144 p.
4. Lippincott Illustrated Reviews: Pharmacology, Author Karen Whalen Lippincott Williams & Wilkins Publishing House, 2018, 576 p.
5. Practical English Usage, Michael Swan, Oxford University Press, 2017, 768 p.

ASSESSMENT CRITERIA

The results of students' academic performance are presented in the form of assessment according to the national scale, 200-point and ECTS scale and have standardized generalized criteria for knowledge assessment.

At the end of the study, the current performance is calculated as the average current score, i.e. the arithmetic mean of all current grades according to the traditional scale, rounded to two decimal places.

Only those students who do not have academic debts and their average score for current educational activities is at least 3.00 are allowed to the final certification.

The form of final control is grading test. The grading test is set at the last lesson of the discipline based on the results of the final recitation with the mandatory performance by the student of all types of work provided for in the working curriculum and assessed for the current educational activity on average not less than 3.00. The grade obtained for the answer at the grading test and the score of the average current performance during the study of the discipline are used to calculate the arithmetic mean, which is the overall grade for the discipline.

Example of a task for a grading test in English for professional purposes for second-year students of the Faculty of Pharmacy:

1. Translate the sentence into English (5 sentences).
2. Answer the questions in English (5 questions).

The score for the grading test is calculated as follows:

"5" → 9 - 10 correct answers

"4" → 7 - 8 correct answers

"3" → 5 - 6 correct answers

Grades "good" and "satisfactory", obtained by the student in the final control (grading test), are not re-added.

A student who has been admitted to a grading test and failed to take it without good reason is considered to have received an unsatisfactory grade.

Independent work of students

Individual topics from the discipline are submitted for independent work, which must be worked out by students. All methodical materials, IWS topics and tasks are posted on the university website. In case of questions, the student can seek advice from his teacher. Quality control of knowledge on IWS topics is carried out by testing during practical classes. Test tasks are also posted on the site.

Course policy

Deadline and recompilation policy

All missed classes must be completed according to the schedule of the Department of Foreign Languages (Tuesday - 1 missed class; Saturday - 2 missed classes).

Academic Integrity Policy:

- compliance with the law
- independent performance of educational tasks
- links to sources of information in the case of the use of ideas, developments, information
- providing reliable information about the results of their own scientific activities

Attendance and lateness policy

Attendance is mandatory. Late for classes is undesirable.

Mobile devices

The use of technical means (earphones, telephones, smartphones) is unacceptable in educational activities for participants in the educational process.

Behavior in the audience

The special course "Foreign language" provides for practical classes, so in each class the student must have a textbook and notebook, do homework and demonstrate the level of learning material. Student relationships in the classroom should be friendly.
