

**Odessa National Medical University**  
**Faculty of stomatology**  
**Department of Surgery №3**

**Syllabus course**  
**"Surgery"**

<b>Amount</b>	3.0 credits / 90 hours
<b>Semester, year of study</b>	V-VI semester, III year of study
<b>Days, time, place</b>	According to the schedule on the basis of the Department of Surgery №3: Center for reconstructive and restorative medicine, Tenista street, 8; City Clinical Hospital № 11, Academician Vorobyov str. 5
<b>Teacher (s)</b>	All teachers of the department. Head study of the Department Vitaliy Vitaliyovych Kryzhanivsky, Candidate of Medical Sciences, Docent
<b>Contact phone</b>	067-531-66-59
<b>E-mail</b>	kvvsurgeon@gmail.com
<b>Workplace</b>	Classrooms of the Department of Surgery №3: Tenista street, 8; Academician Vorobyov street, 5
<b>Consultations</b>	<i>Eye consultations:</i> Wednesday from 15:00 to 17:00; Saturday from 9.00 to 13.00 <i>Online consultations:</i> Wednesday from 15.00 to 17.00; Saturday from 9.00 to 13.00 via MC Teams, Zoom

### **COMMUNICATION**

Communication with students will be through face-to-face meetings. In case of transition to distance learning, communication with students will be carried out by E-mail and programs: Microsoft Teams, Telegram and Viber.

### **COURSE ANNOTATION**

**The subject** of the study is the definition of diagnostic methods, algorithms for conservative and surgical treatment of surgical diseases, depending on the characteristics of their clinical manifestations; study of differential diagnosis of diseases of the chest organs; diseases of the abdominal organs, endocrine organs and vascular diseases. Identification of the principles of surgical treatment and rehabilitation of patients with surgical pathology; study of risk factors for complications; study of the results of laboratory and instrumental studies.

**Prerequisites of the course:** human anatomy - determination of topographic and anatomical relationships of organs and body systems; microbiology: virology and immunology - interpretation of the biological properties of pathogenic and non-

pathogenic microorganisms; surgery - to provide emergency medical care for the most common surgical conditions.

***Postrequisites of the course:*** the formation of the ability to apply knowledge of surgery in the process of further training in professional activities.

***The goal of the course*** is to master the methods of diagnosis, treatment and prevention of surgical diseases; primarily the most common and urgent.

***The task of the discipline:***

- Know the diagnosis and algorithms of conservative and surgical treatment of surgical diseases;
- Master the methods of differential diagnosis of chest diseases; diseases of the abdominal organs, endocrine organs and vascular diseases;
- To study the principles of postoperative treatment and rehabilitation of patients with surgical pathology
- Interpret the results of laboratory and instrumental studies of the digestive, cardiovascular and respiratory systems;
- Know the risk factors for complications of surgical diseases

***Expected results:***

- Be able to determine the necessary diagnostic methods, an algorithm for conservative and surgical treatment of surgical diseases of the digestive, cardiovascular, and respiratory systems
- Be able to differentiate diagnosis of diseases of the abdominal cavity and chest;
- Be able to interpret the results of laboratory and instrumental studies in surgical patients;
- Be able to provide emergency medical care for urgent surgical diseases of the digestive, respiratory system
- Be able to fill out medical records in the department of surgical diseases.

## **COURSE DESCRIPTION**

### ***Forms and methods of teaching***

The course will be presented in the form of practical lessons (30 hours), organization of students' independent study (40 hours). Provides for individual and group consultations on the study of skills in the office of practical skills.

### ***The content of the discipline***

1. Shock. Shock therapy.
2. Extreme conditions. Cardiopulmonary resuscitation
3. Endemic and sporadic goiter. Thyrotoxicosis. Diffuse toxic and nodular goiter. Thyroiditis,
4. Diseases of the breast. Acute mastitis. Dyshormonal diseases of the breast.
5. Acute purulent pleurisy. Empyema of the pleura. Abscess and lung gangrene.

6. Cardiospasm. Burns, cicatricial narrowing of the esophagus. Esophageal carcinoma. Diseases of the esophagus. Diverticula of the esophagus. Esophagitis. Damage, foreign bodies of the esophagus. Mediastinitis. Etiology, pathogenesis, clinical picture, diagnosis, treatment.
7. Thrombophlebitis. Phlebothrombosis. Postthrombophlebitis syndrome. Varicose veins of the lower extremities. Obliterating atherosclerosis. Obliterating endarteritis. Raynaud's disease. Leriche and Takayasu's syndrome.
8. General herniology. Inguinal, femoral, umbilical, postoperative, diaphragmatic and rare types of hernias. Complications of hernias.
9. Acute appendicitis. Complications of acute appendicitis.
10. Cholelithiasis. Acute cholecystitis. Chronic cholecystitis. Minimally invasive surgery. Surgical liver diseases. Abscesses, echinococcosis, liver alveococcosis. Liver injury. Benign and malignant liver tumors.

## **Credit.**

### ***List of recommended reading***

#### **Basic :**

1. Gozlie Offiah, Arnold Hill//RCSI Handbook of Clinical Surgery for Finals. 4<sup>th</sup> ed. 2020
2. Цигикало О. В. Clinical Anatomy and Operative Surgery=Клінічна анатомія і оперативна хірургія.. Підручник для ВМНЗ IV р.а.: Рекомендовано МОЗ: 2020/ 528 с.
3. Березницький Я. С. (за ред.) General Surgery=Загальна хірургія. — 2-ге вид. Підручник для ВМНЗ III—IV р.а.: Рекомендовано ДУ“Центр.метод.каб.з вищої мед.освіти МОЗ України”: 2020/ 328 с.
4. Christian de Virgilio, Areg Grigorian//Surgery: A Case Based Clinical Review. 2nd Ed. 2020

15. Schwartz's Principles Of Surgery With DVD Hardcover – 2014 by F. Charles Brunicaardi (Author), Dana K. Andersen (Author), Timothy R. Billiar (Author), David L. Dunn (Author), John G. Hunter (Author), & 2 More

## EVALUATION

Different forms of control of classes in this discipline are used in teaching (oral, written, combined, testing, practical skills, etc.). The results of students' academic success are presented in the form of assessment on the national scale, 200-point and ECTS scale and have standardized generalized criteria for assessing knowledge:

*national scale:*

- mark "**excellent**" is given to the student who systematically studied during a semester, showed various and deep knowledge of a program material, is able to successfully carry out tasks which are provided by the program, has mastered the basic and additional literature, has understood interrelation of separate sections of discipline. importance for the future profession, showed creative abilities in understanding and using educational material, showed the ability to independently update and replenish knowledge; level of competence - *high (creative)*;
- mark "**good**" is given to a student who has shown full knowledge of the program material, successfully completes the tasks provided by the program, mastered the basic literature recommended by the program, showed a sufficient level of knowledge of the discipline and is able to independently update during further study and professional activity; level of competence - *sufficient (constructive-variable)*;
- mark "**satisfactory**" is given to the student who has shown knowledge of the basic educational program material in the volume necessary for the further training and the subsequent work on a profession, copes with performance of the tasks provided by the program, has made separate mistakes in answers and at performance of tasks, but has the necessary knowledge to overcome mistakes under the guidance of a research and teaching staff; level of competence - *average (reproductive)*;
- mark "**unsatisfactory**" is given to the student who did not show sufficient knowledge of the basic educational and program material, made fundamental mistakes in performance of the tasks provided by the program, cannot use the knowledge at the further training without the teacher's help, failed to master skills of independent study; level of competence - *low (receptive-productive)*.

*The multi-point scale* characterizes the actual success of each student in mastering the discipline. Conversion of the traditional grade from the discipline to 200-point is performed by the information and computer center of the university program "Contingent" by the formula:

$$\text{grade point average (current / discipline) x 40}$$

National mark	Balls
“5”	185 - 200
“4”	151 - 184
“3”	120 - 150

**Final credit.** Students who have fully completed the curriculum of the discipline have no academic debt, their average score of current performance is 3.00 or more, in the last class receive a credit, which is set as "passed" / "not passed". Conversion of a traditional national score to a multi-point score (maximum 200 points) is required.

If a student receives a minimum grade point average of 3.00 for current success, even if there are unsatisfactory grades, he receives a credit for the discipline.

The ECTS rating scale evaluates the achievements of students in the discipline who study in one course of one specialty, in accordance with the points obtained by them, by ranking, namely:

ECTS assessment	Statistical indicator
«A»	the best 10% of students
«B»	the next 25% of students
«C»	the next 30% of students
«D»	the next 25% of students
«E»	the last 10% of students

The ECTS scale establishes the student's belonging to the group of the best or worst among the reference group of classmates (faculty, specialty), i.e. his rating. When converting from a multi-point scale, as a rule, the limits of grades "A", "B", "C", "D", "E" do not coincide with the limits of grades "5", "4", "3" on the traditional scale. Grade "A" on the ECTS scale cannot be equal to grade "excellent", and grade "B" - grade "good" and so on.

Students who receive grades "Fx" and "F" ("2") are not included in the list of ranked students. Such students automatically receive a score of "E" after retake.

The grade "Fx" is given to students who scored the minimum number of points for the current educational activity, but who did not pass the final control. Grade "F" is given to students who have attended all classes in the discipline, but did not score an average score (3.00) for current academic activities and are not admitted to the final control.

Criteria for assessing the current performance of students is reflected in the work program in the disciplines, indicating a clear structure of student receipt in the assessment class.

### **Independent study of students.**

Independent study of students, which is provided by the topic of the lesson along with classroom work, is assessed during the current control of the topic in the corresponding lesson. The assimilation of topics that are taken out only for independent study is checked at the last lesson.

Topics of independent study of students:

1. Congenital diseases and malformations of the organs of the neck.
2. Congenital "blue" and "white" heart defects.
3. Acquired heart defects.
4. Liver cancer.
5. Breast cancer.
6. Bronchiectasis.
7. Lung cancer.
8. Burns and cicatricial narrowing of the esophagus.
9. Diseases of the mediastinal organs.
10. Tumors and cysts of the mediastinum.
11. Diaphragmatic and rare types of hernias.
12. Cancer of the thyroid gland.
13. Acute appendicitis in children, pregnant women.

### **COURSE POLICY**

***Policy regarding deadlines and retakes:*** tasks are completed on time, prepare daily. For late completion of the task, the student receives an unsatisfactory grade. The retake of the lesson is carried out according to the work schedule

#### ***Academic Virtue Policy:***

- The student must independently complete homework, tasks of current and final control, tasks of Krok-2.
- Rely on sources of information when using ideas, developments of other authors

#### ***Attendance and late arrivals policy.***

To obtain a satisfactory grade, it is compulsory to attend and work during the classroom. A student is allowed to be late for no more than 10 minutes.

***Mobile devices: students can use mobile devices in class with the teacher's permission.***

#### ***Classroom behavior:***

While in the classroom, the following are important: respect for colleagues; tolerance towards others; sensitivity and impartiality; the ability to agree with the opinion, but respect the personality of the opponent / s (during discussions); careful argumentation of your opinion; adherence to ethics of academic relations.
