GRADING

Control measures include current and final controls. The current educational activity of students is controlled in practical classes in accordance with specific goals and during the individual work of the teacher with students. The following means of diagnosing the level of preparation of students are used: oral examination in accordance with the guidelines developed by the teacher; system of training exercises and creative tasks; block of test tasks; independent work; writing essays and scientific reports.

Evaluation of the success of the study of each topic of the discipline is performed on a traditional 4-point scale.

At least 50% of students must be interviewed in a practical lesson. At the end of the semester (cycle), the number of grades for students in the group should be the same on average.

At the end of the course, the current performance is calculated as the average current score, ie the arithmetic mean of all grades obtained by the student on a traditional scale, rounded to 2 (two) decimal places, for example 4.75.

Final control is carried out after its completion. The assessment of a student's success in the discipline is a rating and is set on a multi-point scale as the arithmetic mean of mastering the relevant thematic blocks and should be determined by the ECTS system and the traditional scale adopted in Ukraine. For those students who want to improve their academic performance on the ECTS scale, the final control is carried out in addition to the schedule approved by the institution.

The grade for the discipline is 50% of the current performance (arithmetic mean of all current student grades) and 50% - the grade on the exam.

To assess the discipline on a 4-point traditional (national) scale, the average score for the discipline is first calculated as the arithmetic mean of the two components:

1) the average current score as the arithmetic of all current scores (calculated as a number rounded to 2 (two) decimal places, for example, 4.76);

2) traditional grade for the exam.

The average score for the discipline is translated into the traditional grade from the discipline on a 4-point scale and is regarded as the ratio of this arithmetic mean to the percentage of mastering the required amount of knowledge in the subject.

The maximum number of points assigned to students in mastering each topic - "excellent".

- for current educational activity and VTS - average score.

- for the entire academic discipline, the arithmetic mean of the current activity in the amount with the grade for the exam.

COURSE POLICY

The policy on deadlines and reassembly complies with the general rules at ONMedU.

Observance of academic integrity by students provides: independent performance of educational tasks. The use of prohibited auxiliary materials or technical means during the control activities is unacceptable for the participants of the educational process. For violation of academic integrity, students may be held academically liable: reduction of assessment results; re-assessment.

Attendance and lateness policy: Attendance is mandatory. At the beginning of the lesson there is a check of students' presence. The consequence of the absence of the lesson is the obligatory further elaboration of the topic.

Mobile devices: used for training purposes only.

Behavior in the audience: according to the moral and ethical code of ONMedU.
