PROGRAM
OF AN ENTRANCE EXAMINATION IN THE ENGLISH LANGUAGE
FOR FOREIGN APPLICANTS IN A REMOTE FORMAT

Odesa
2024

The goal of the assessment of the English language is to evaluate the degree of preparedness of international candidates in the English language for competitive selection for study at Odessa National Medical University.

The proposed English language entrance exam program was created according to the main criteria of the State Standard as to the complete secondary education and of the European recommendations as to the foreign language level (level B1).

The contents of the tasks to assess the quality of formation of the foreign language communicative competence are unified by the types and forms of performance and take into account the English language peculiarities.

The objects of control are the **use of language and speaking** as types of language activity.

The contents of the tests are based on authentic literary language samples accepted in the UK and respond to the areas and topics of situational communication.

The entrance examination in the English language takes place orally online. The total number of tasks is 2, 5 questions in the first task, and 1 - in the second.

The program was discussed and approved at the sitting of the admission board of Odessa National Medical University (Record No. 4 of 24.04.2024).

The program was approved by the order of Rector of ONMedU № 206-0 of 24.04.2024

INTRODUCTION

The current paradigm of higher education considers foreign languages as an important means of intercultural communication. This approach orients the process of studies to the formation of ability in graduates of secondary schools for social contacts with representatives of other linguocultures in most typical situations of verbal interaction. Achievement of this level of formation of skills and abilities is provided by the interrelated communicative, cognitive and socio-cultural development of the higher education seeker.

Assessment of the **lexical and grammatical competence (language use)** includes determining the level of formation of language skills, and the ability to choose and build lexical items and grammatical phenomena independently according to the communication needs within the defined tasks. The basis for types and contents of the test assignment selection are the tasks of cognitive communicative orientation.

GENERAL DESCRIPTION OF THE MAIN COMPONENTS OF THE INDIVIDUAL ORAL INTERVIEW

The test assignment includes 2 tasks. The answers require a deep knowledge of the English language in the amount specified by the program of the secondary school, the ability to express thoughts in the English language logically and to assess phenomena.
